Ratio of net investment income (loss) to average net assets	2.17% (6)	0.20%	(1.22)%	(0.78)%	0.44%	0.02%
Portfolio Turnover Rate	0% (7)	0%	0%	0%	0%	0%

(1) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(2) Total returns shown assume changes in share price and reinvestment of dividends and capital gain distributions. Had the adviser not waived a portion of its fees, total returns would have been lower.

(3) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the adviser.

(4) For the year ended December 31, 2022, 0.45% of the Fund's total return consisted of a voluntary reimbursement by a related party. Excluding this item, total return would have been (16.55)%.

(5) Amount represents less than \$0.005 per share.

(6) Annualized for periods less than one full year.

(7) Not annualized.

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)**  
**June 30, 2023**

**I. ORGANIZATION**

The Princeton Long/Short Treasury Fund (the “Fund”) is a non-diversified series of shares of beneficial interest of Northern Lights Fund Trust (the “Trust”), a statutory trust organized under the laws of the State of Delaware on January 19, 2005, and registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company. The investment objective of the Fund is to seek capital appreciation with a secondary objective of providing income. The Fund commenced operations on February 1, 2017.

The Fund offers Class A, Class C and Class I shares. Currently, Class C shares are not available for purchase. Class A shares are offered at net asset value plus a maximum sales charge of 5.75%, which may be waived at the adviser’s discretion. Class I shares are offered at net asset value. Each class represents an interest in the same assets of the Fund and classes are identical except for differences in their sales charge structures and ongoing service and distribution charges. All classes of shares have equal voting privileges except that each class has exclusive voting rights with respect to its service and/or distribution plans. The Fund’s income, expenses (other than class specific distribution fees) and realized and unrealized gains and losses are allocated proportionately each day based upon the relative net assets of each class.

**2. SIGNIFICANT ACCOUNTING POLICIES**

The following is a summary of significant accounting policies followed by the Fund in preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses for the period. Actual results could differ from those estimates. The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 “Financial Services – Investment Companies”.

**Security Valuation** – Securities listed on an exchange are valued at the last reported sale price at the close of the regular trading session of the primary exchange on the business day the value is being determined, or in the case of securities listed on NASDAQ at the NASDAQ Official Closing Price (“NOCP”). In the absence of a sale, such securities shall be valued at the mean between the current bid and ask prices on the primary exchange on the day of valuation. Debt securities (other than short-term obligations) are valued each day by an independent pricing service approved by the Trust’s Board of Trustees (the “Board”) using methods which include current market quotations from a major market maker in the securities and based on methods which include the consideration of yields or prices of securities of comparable quality, coupon, maturity and type. Options are valued based on the daily price reported from the counterparty. Short-term debt obligations having 60 days or less remaining until maturity, at time of purchase, may be valued at amortized cost, which approximates fair value.

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

The Fund may hold securities, such as private investments, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued using the “fair value” procedures approved by the Board. The Board has delegated execution of these procedures to the Adviser as its valuation designee (the “Valuation Designee”). The Board may also enlist third party consultants such as a valuation specialist at a public accounting firm, valuation consultant or financial officer of a security issuer on an as-needed basis to assist the Valuation Designee in determining a security-specific fair value. The Board is responsible for reviewing and approving fair value methodologies utilized by the Valuation Designee, which approval shall be based upon whether the Valuation Designee followed the valuation procedures established by the Board.

**Fair Valuation Process** – The applicable investments are valued by the Valuation Designee pursuant to valuation procedures established by the Board. For example, fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source); (ii) securities for which, in the judgment of the Valuation Designee, the prices or values available do not represent the fair value of the instrument; factors which may cause the Valuation Designee to make such a judgment include, but are not limited to, the following: only a bid price or an ask price is available; the spread between bid and ask prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; and (iv) securities with respect to which an event that will affect the value thereof has occurred (a “significant event”) since the closing prices were established on the principal exchange on which they are traded, but prior to a Fund’s calculation of its net asset value. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private investments or non-traded securities are valued based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If a current bid from such independent dealers or other independent parties is unavailable, the Valuation Designee shall determine, the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Fund's holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

*Options Transactions* - The Fund is subject to equity price risk, interest rate risk, commodity price risk and foreign currency exchange rate risk in the normal course of pursuing its investment objective and

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

may purchase or sell options to help hedge against this risk. When the Fund purchases an option, an amount equal to the premium paid by the Fund is recorded as an investment and is subsequently adjusted to the current value of the option purchased. If an option expires on the stipulated expiration date or if the Fund enters into a closing sale transaction, a gain or loss is realized. If a call option is exercised, the cost of the security acquired is increased by the premium paid for the call. If a put option is exercised, a gain or loss is realized from the sale of the underlying security, and the proceeds from such a sale are decreased by the premium originally paid. Written and purchased options are non-income producing securities. The Fund invests in options which are not traded on an exchange. In doing so, it is assuming a credit risk with regard to the party with which it trades and also bears the risk of settlement default. These risks may differ materially from risks associated with transactions effected on an exchange, which generally are backed by clearing organization guarantees, daily mark-to-market and settlement, segregation and minimum capital requirements applicable to intermediaries. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

The Fund's option investment is based off the performance of Galaxy Plus Fund – ProfitScore Long/Short Feeder Fund (536) LLC (“GPPS”). The Advisor and Nomura are receiving a quote directly from GPPS reporting Nomura's proportionate share and NAV per share on a daily basis. At the option renewal date, the Advisor is paying an upfront payment on the option known as a premium. As this premium is paid upfront, it is not paid at the point in which the option is exercised. New Hyde Park Alternatives, LLC (“NHPA”) acts as the sponsor for GPPS, and Formidium (f/k/a Sudrania Fund Services) (“FFS”) provides administration services for GPPS. Both GPPS and Galaxy Plus Fund – ProfitScore Long/Short Master Fund (536) LLC (“GPPSM”) are sponsored by NHPA. Further, one of NHPA's lines of business is to create investment vehicles for, as a means of making available to qualified high net-worth individuals and institutional investors, a variety of third-party professional managed futures and foreign exchange advisors. GPPS is one such investment vehicle. So while the trading decisions of that investment are given to third party investment advisors through power of attorney, the vehicle remains an entity that is controlled, in all other aspects, by GAF. Effective January 1, 2022, Formidium Fund Services serves as the administrator.

As of June 30, 2023 the fair value on the option contracts was \$4,043,747. The notional value of the derivative instruments outstanding as of June 30, 2023 as disclosed in the Schedule of Investments and the amounts of realized and changes in unrealized gains and depreciation on investments subject to interest rate exposure during the year as disclosed in the Statement of Operations serve as indicators of the volume of derivative activity for the Fund. For the six months ended June 30, 2023, the net change in unrealized appreciation on the option contract was \$945,553. The cumulative unrealized

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

depreciation on the option contract is disclosed on the Statement of Assets and Liabilities. For the six months ended June 30, 2023, the Fund had net realized loss on investments of \$460,966 from the option contract, as disclosed on the Statement of Operations. The fair value on the option contract is disclosed on the Statement of Assets and Liabilities. The option matures on August 21, 2023.

The Fund utilizes various methods to measure the fair value of all of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of input are:

Level 1 – Unadjusted quoted prices in active markets for identical assets and liabilities that the Fund has the ability to access.

Level 2 – Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument in an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

The following tables summarize the inputs used as of June 30, 2023 for the Fund's assets and liabilities measured at fair value:

Assets *	Level 1	Level 2	Level 3	Total
Call Options Purchased	\$ -	\$ 4,043,747	\$ -	\$ 4,043,747
U.S. Government & Agencies	-	7,936,220	-	7,936,220
Short Term Investment	2,140,278	-	-	2,140,278
<b>Total</b>	<b>\$ 2,140,278</b>	<b>\$ 11,979,967</b>	<b>\$ -</b>	<b>\$ 14,120,245</b>

The Fund did not hold any Level 3 securities during the period.

\* See Schedule of Investments for industry classification.

*Commodity Risk* - Commodity risk relates to the change in value of commodities or commodity indexes as they relate to increases or decreases in the commodities market. Commodities are physical assets that have tangible properties. Examples of these types of assets are crude oil, heating oil, metals, livestock, and agricultural products.

*Credit Risk* - Credit risk relates to the ability of the issuer to meet interest and principal payments, or both, as they come due. In general, lower-grade, higher-yield bonds are subject to credit risk to a greater extent than lower-yield, higher-quality bonds.

*Equity Risk* - Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

*Interest Rate Risk* - Interest rate risk refers to the fluctuations in value of fixed-income securities resulting from the inverse relationship between price and yield. For example, an increase in general interest rates will tend to reduce the market value of already issued fixed-income investments, and a decline in general interest rates will tend to increase their value. In addition, debt securities with longer maturities, which tend to have higher yields, are subject to potentially greater fluctuations in value from changes in interest rates than obligations with shorter maturities.

*Market and Geopolitical Risk* - The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund.

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

*Options Risk* - There are risks associated with the sale and purchase of call and put options. As a seller (writer) of a put option, the Fund will tend to lose money if the value of the reference index or security falls below the strike price. As the seller (writer) of a call option, the Fund will tend to lose money if the value of the reference index or security rises above the strike price. As the buyer of a put or call option, the Fund risks losing the entire premium invested in the option if the Fund does not exercise the option.

*Volatility Risk* - Volatility risk refers to the magnitude of the movement, but not the direction of the movement, in a financial instrument's price over a defined time period. Large increases or decreases in a financial instrument's price over a relative time period typically indicate greater volatility risk, while small increases or decreases in its price typically indicate lower volatility risk. Please refer to the Fund's prospectus for a full listing of risks associated with the Fund's investment strategy.

**Security Transactions and Related Income** – Security transactions are accounted for on the trade date. Interest income is recognized on an accrual basis. Discounts are accreted and premiums are amortized on securities purchased over the lives of the respective securities. Dividend income is recorded on the ex-dividend date. Realized gains or losses from sales of securities are determined by comparing the identified cost of the security lot sold with the net sales proceeds. The difference between the cost and fair value of open investments is reflected as unrealized appreciation (depreciation) on investments and any change in that amount from the prior period is reflected in the accompanying Statement of Operations.

**Trading Costs** – Trading costs generally consists of brokerage commissions, brokerage fees, clearing fees, exchange and regulatory fees, and transaction and National Futures Association fees (“NFA”). Fees vary by type of contract for each purchase and sale or sale and purchase (round turn) of futures, options on futures, and forward contracts and are included in the net realized gain on investments in the Statement of Operations. Commissions are paid on each individual purchase and sale transaction.

**Dividends and Distributions to Shareholders** – Dividends from net investment income, if any, are declared and paid at least annually. Distributable net realized capital gains, if any, are declared and distributed annually. Dividends from net investment income and distributions from net realized gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These “book/tax” differences are considered either temporary (i.e., deferred losses, capital loss carry forwards) or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences do not require reclassification. Dividends and distributions to shareholders are recorded on the ex-dividend date.

**Federal Income Taxes** – The Fund complies with the requirements of the Internal Revenue Code applicable to regulated investment companies and intends to distribute all of its taxable income to its shareholders. Therefore, no provision for federal income tax is required. The Fund recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

assuming examination by tax authorities. Management has analyzed the Fund's tax positions and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax year ended December 31, 2020 and December 31, 2021, or expected to be taken in the Fund's December 31, 2022 year-end tax return. The Fund identifies its major tax jurisdictions as U.S. federal, Ohio and foreign jurisdictions where the Fund makes significant investments; however the Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months.

**Expenses** – Expenses of the Trust that are directly identifiable to a specific Fund are charged to that Fund. Expenses, which are not readily identifiable to a specific Fund, are allocated in such a manner as deemed equitable (as determined by the Board), taking into consideration the nature and type of expense and the relative sizes of the Funds in the Trust.

**Indemnification** – The Trust indemnifies its officers and Trustees for certain liabilities that may arise from the performance of their duties to the Trust. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnities. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, based on experience, the risk of loss due to these warranties and indemnities appears to be remote.

### **3. INVESTMENT TRANSACTIONS**

For the six months ended June 30, 2023, cost of purchases and proceeds from sales of portfolio securities, other than short-term investments and U.S Government obligations, amounted to \$0 and \$0, respectively.

### **4. INVESTMENT ADVISORY AGREEMENT AND TRANSACTIONS WITH RELATED PARTIES**

Princeton Fund Advisors, LLC serves as the Fund's investment adviser (the "Adviser").

Pursuant to an investment advisory agreement with the Trust on behalf of the Fund, the Adviser, under the oversight of the Board, directs the daily operations of the Fund and supervises the performance of administrative and professional services provided by others. As compensation for its services and the related expenses borne by the Adviser, the Fund pays the Adviser an investment advisory fee, computed and accrued daily and paid monthly, at an annual rate of 1.00% of the Fund's average daily net assets. For the six months ended June 30, 2023, the Fund incurred advisory fees of \$74,059.

Pursuant to a written contract (the "Waiver Agreement"), the Adviser has agreed, at least until May 31, 2024, to waive a portion of its advisory fee and has agreed to reimburse the Fund for other expenses to the extent necessary so that the total expenses incurred by the Fund (excluding any front-end or contingent deferred loads; brokerage fees and commissions, acquired fund fees and expenses; fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses); borrowing costs (such as

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

interest and dividend expense on securities sold short); taxes; expenses incurred in connection with any merger or reorganization; and extraordinary expenses; such as litigation expenses (which may include indemnification of Fund officers and Trustees, and contractual indemnification of Fund service providers (other than the Adviser))) do not exceed 1.50% and 1.25% per annum of the Fund’s average daily net assets for Class A and Class I shares, respectively (the “Expense Limitation”).

If the Adviser waives any fee or reimburses any expense pursuant to the Waiver Agreement, and the Fund's Operating Expenses are subsequently less than the Expense Limitation, the Adviser shall be entitled to reimbursement by the Fund for such waived fees or reimbursed expenses provided that such reimbursement does not cause the Fund's expenses to exceed the Expense Limitation. If Fund operating expenses subsequently exceed the Expense Limitation the reimbursements shall be suspended.

The Adviser may seek reimbursement only for expenses waived or paid by it during the three years prior to such reimbursement; provided, however, that such expenses may only be reimbursed to the extent they were waived or paid after the date of the Waiver Agreement (or any similar agreement). The Board may terminate this expense reimbursement arrangement at any time. For the six months ended June 30, 2023, the Fund waived \$85,879 in fees pursuant to the Waiver Agreement.

The following amounts previously waived by the Adviser are subject to recapture by the Fund by the following dates:

12/31/2023	12/31/2024	12/31/2025
\$ 159,998	\$ 166,193	\$ 179,006

The Trust, with respect to the Fund’s Class A shares, has adopted the Trust’s Master Distribution and Shareholder Servicing Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. The Plan provides that a monthly service and/or distribution fee is calculated by the Fund at an annual rate of 0.25% of the average daily net assets attributable to the Class A shares, respectively, and is paid to Foreside Distribution Services, L.P. (the “Distributor”), to provide compensation for ongoing distribution-related activities or services and/or maintenance of the Fund’s shareholder accounts, not otherwise required to be provided by the Adviser. The Plan is a compensation plan, which means that compensation is provided regardless of 12b-1 expenses incurred. For the six months ended June 30, 2023, the Fund’s Class A shares incurred \$150 in fees under the Plan.

The Distributor acts as the Fund’s principal underwriter in a continuous public offering of the Fund’s Class A and Class I shares. For the six months ended June 30, 2023, the Distributor received \$1,518 in underwriting commissions for sales of Class A shares, of which \$243 was retained by the principal underwriter or other affiliated broker-dealers.

Ultimus Fund Solutions, LLC (“UFS”) – UFS provides administration, fund accounting, and transfer agent services to the Trust. Pursuant to separate servicing agreements with UFS, the Fund pays UFS customary fees for providing administration, fund accounting and transfer agency services to the Fund. Certain officers of the Trust are also officers of UFS, and are not paid any fees directly by the Fund for serving in such capacities.

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

Northern Lights Compliance Services, LLC (“NLCS”) – NLCS, an affiliate of UFS, provides a Chief Compliance Officer to the Trust, as well as related compliance services, pursuant to a consulting agreement between NLCS and the Trust. Under the terms of such agreement, NLCS receives customary fees from the Fund.

Blu Giant, LLC (“Blu Giant”) – Blu Giant, an affiliate of UFS and NLCS, provides EDGAR conversion and filing services as well as print management services for the Fund on an ad-hoc basis. For the provision of these services, Blu Giant receives customary fees from the Fund.

**5. CONTROL OWNERSHIP**

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of each Fund creates presumption of the control of the Funds, under section 2(a)9 of the Act. As of June 30, 2023, Charles Schwab Savings Bank held 79.39% of the voting securities of the Fund. The Trust has no knowledge as to whether all or any portion of the shares owned of record by Charles Schwab are also owned beneficially.

**6. DISTRIBUTIONS TO SHAREHOLDERS AND TAX COMPONENTS OF CAPITAL**

There were no Fund distributions for the years ended December 31, 2022 and December 31, 2021.

As of December 31, 2022, the components of distributable earnings/ (deficit) on a tax basis were as follows:

Undistributed Ordinary Income	Undistributed Long-Term Gains	Post October Loss and Late Year Loss	Capital Loss Carry Forwards	Other Book/Tax Differences	Unrealized Appreciation/ (Depreciation)	Total Distributable Earnings/ (Accumulated Deficit)
\$ -	\$ -	\$ (1,382,345)	\$ (4,155,901)	\$ -	\$ (3,772,326)	\$ (9,310,572)

Capital losses incurred after October 31 within the fiscal year are deemed to arise on the first business day of the following fiscal year for tax purposes. The Fund incurred and elected to defer such capital losses of \$1,382,345.

At December 31, 2022, the Fund had capital loss carry forwards for federal income tax purposes available to offset future capital gains, along with capital loss carryforwards utilized as follows:

Short-Term	Long-Term	Total	CLCF Utilized
\$ 3,552,531	\$ 603,370	\$ 4,155,901	\$ 790,983

Permanent book and tax differences, primarily attributable to differences in book/tax basis treatment of net operating loss resulted in reclassifications for the Fund for the fiscal year ended December 31, 2022 as follows:

Paid In Capital	Accumulated Deficit
\$ (30,283)	\$ 30,283

**Princeton Long/Short Treasury Fund**  
**NOTES TO FINANCIAL STATEMENTS (Unaudited)(Continued)**  
**June 30, 2023**

**7. AGGREGATE UNREALIZED APPRECIATION AND DEPRECIATION – TAX BASIS**

Tax Cost	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Depreciation
\$ 16,945,434	\$ 2,570	\$ (2,827,759)	\$ (2,825,189)

**8. SUBSEQUENT EVENTS**

Subsequent events after the date of the Statement of Assets and Liabilities have been evaluated through the date the financial statements were issued.

Management has determined that no events or transactions occurred requiring adjustment or disclosure in the financial statements.

# Princeton Long/Short Treasury Fund

## EXPENSE EXAMPLES (Unaudited)

June 30, 2023

As a shareholder of the Princeton Long/Short Treasury Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchases of Class A shares; and (2) ongoing costs, including management fees; distribution and/or service (12b-1) fees; and other Princeton Long/Short Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from January 1, 2023 through June 30, 2023.

### Actual Expenses

The “Actual” lines in the table below provide information about actual account values and actual expenses. You may use the information below, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

### Hypothetical Example for Comparison Purposes

The “Hypothetical” lines in the table below provide information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balances or expenses you paid for the period. You may use this information to compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), or redemption fees. Therefore, the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value	Ending Account Value	Expenses Paid During Period*	Net Expense Ratio During Period **
Actual	1/1/2023	6/30/2023	1/1/2023 - 6/30/2023	1/1/2023 - 6/30/2023
Class A	\$1,000.00	\$1,049.10	\$7.62	1.50%
Class I	1,000.00	1,049.30	6.35	1.25%
Hypothetical (5% return before expenses)	Beginning Account Value	Ending Account Value	Expenses Paid During Period*	Net Expense Ratio During Period **
	1/1/2023	6/30/2023	1/1/2023 - 6/30/2023	1/1/2023 - 6/30/2023
Class A	\$1,000.00	\$1,017.36	\$7.50	1.50%
Class I	1,000.00	1,018.60	6.26	1.25%

\* “Actual” expenses are equal to the average account value over the period, multiplied by the Fund’s annualized expense ratio, multiplied by the number of days in the period (181) divided by the number of days in the fiscal year (365). “Hypothetical” expense information is presented on the basis of the full one-half year period to enable comparison to other funds. It is based on assuming the same net expense ratio and average account value over the period but is multiplied by 181/365 (to reflect the full half-year period).

\*\* Annualized.

**Additional Information (Unaudited)**  
**June 30, 2023**

**LIQUIDITY RISK MANAGEMENT PROGRAM**

The Fund has adopted and implemented a written liquidity risk management program as required by Rule 22e-4 (the “Liquidity Rule”) under the Investment Company Act. The program is reasonably designed to assess and manage the Fund’s liquidity risk, taking into consideration, among other factors, the Fund’s investment strategy and the liquidity of its portfolio investments during normal and reasonably foreseeable stressed conditions; its short and long-term cash flow projections; and its cash holdings and access to other funding sources.

During the six months ended June 30, 2023, the Trust’s Liquidity Risk Management Program Committee (the “Committee”) reviewed the Fund’s investments and determined that the Fund held adequate levels of cash and highly liquid investments to meet shareholder redemption activities in accordance with applicable requirements. Accordingly, the Committee concluded that (i) the Fund’s liquidity risk management program is reasonably designed to prevent violations of the Liquidity Rule and (ii) the Fund’s liquidity risk management program has been effectively implemented.

## NORTHERN LIGHTS FUND TRUST

Rev. February 2014

### FACTS

#### WHAT DOES NORTHERN LIGHTS FUND TRUST DO WITH YOUR PERSONAL INFORMATION?

#### Why?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

#### What?

The types of personal information we collect and share depends on the product or service that you have with us. This information can include:

- Social Security number and wire transfer instructions
- account transactions and transaction history
- investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

#### How?

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Northern Lights Fund Trust chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information:	Does Northern Lights Fund Trust share information?	Can you limit this sharing?
For our everyday business purposes - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	YES	NO
For our marketing purposes - to offer our products and services to you.	NO	We don't share
For joint marketing with other financial companies.	NO	We don't share
For our affiliates' everyday business purposes - information about your transactions and records.	NO	We don't share
For our affiliates' everyday business purposes - information about your credit worthiness.	NO	We don't share
For nonaffiliates to market to you	NO	We don't share
